### STRATEGIC IT DEPLOYMENT IN THE AUTOMOBILE INDUSTRY

David S. Kung, Ph.D.
College of Business and Public Management
University of La Verne

### The Supply Chain of An Industry

### SUPPLY CHAIN LIFE CYCLE STAGES AND ACTIVITIES

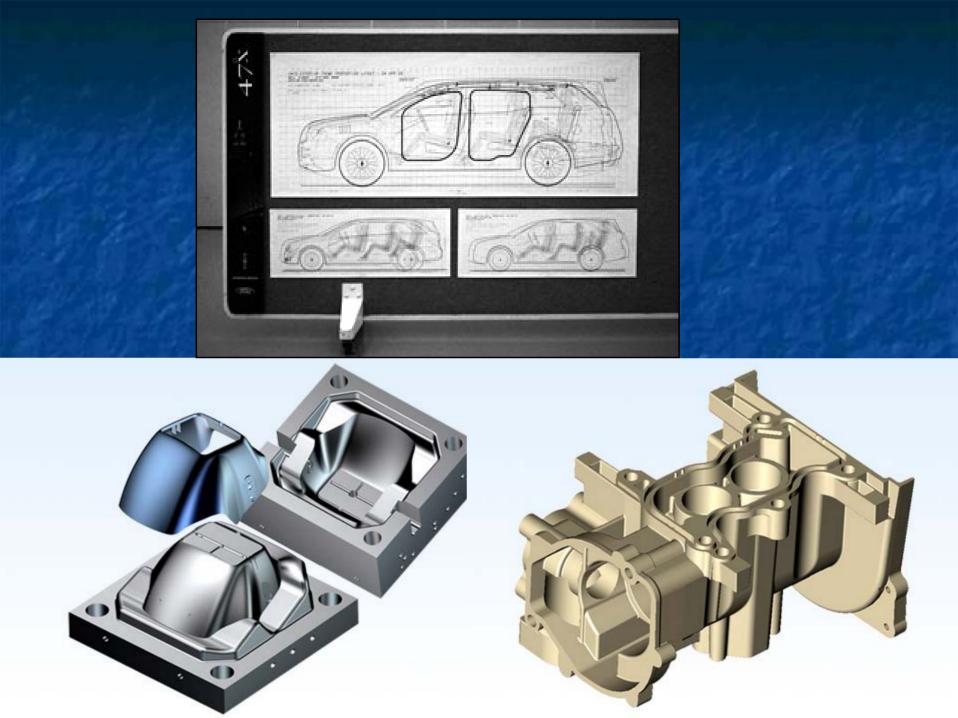

- Product-related Activities
  - Product Design
  - Manufacturing
  - Product Life-Cycle Management
- Logistics-related Activities
  - Demand Planning
  - Supply Planning
  - Fulfillment

## Supply Chain & Product Characteristics

- Bitability of Product
- Cost Structure
- Information Intensity
- Vertical Supply Chain Collaboration
- Standardization Benefits
- Modularity of Product and Processes

#### The Automobile Industry

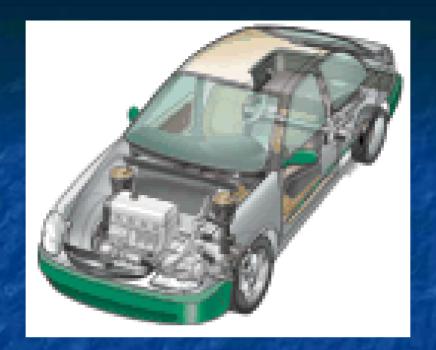

- Supply capacity over demand, globally
- Design, quality, and cost are main drivers
  - Design: satisfying regional characteristics
  - Quality: a standard requirement/perception
  - Cost: Production and Logistics. Availability. Consumer preference.

# The Automobile Industry SC and Product Characteristics

- Bitability: increasing electronic controls.
- Cost structure: capital intensive.
- Information intensity: very rich.
- Vertical SC collaboration: high opportunity.
- Standardization benefits: structural.
- Modularity: very high. Suitable for postponement strategy.

#### Strategic Opportunities

- Supply Chain Life Cycle Restructuring.
  - Reduction of Lead time. Increase SC flexibility.
  - Demand-Pull driven.
  - Complete re-structuring of the Product Process.
  - Focus on total supply chain effectiveness, not only manufacturing effectiveness.
- Engagement with consumers.
  - CRM with consumers regarding product information.
  - CRM with consumers in fulfillment process.
  - CRM with consumers in Product Design.
